Total Pages: 2 Reg No.:___ Name: APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY FOURTH SEMESTER B.TECH DEGREE EXAMINATION, JULY 2017 **Course Code: EC208 Course Name: ANALOG COMMUNICATION ENGINEERING (EC)** Max. Marks: 100 **Duration: 3 Hours** PART A Answer any 2 questions. Question No.1 is compulsory. Starting from the representation of sinusoidally modulated AM wave: -1 (10)i) Find the frequency spectrum for sinusoidal AM ii) Derive the equation for total transmitted power b) Give reason for the occurrence of double spotting in AM receivers. (5) 2 a) Draw the block diagram and explain the working of a low-level AM transmitter. (10)A transmitter with a 10KW carrier transmits 11.2 KW when modulated with a (5) single sine wave: i) Calculate the modulation index. ii) If the carrier is also simultaneously modulated with another sine wave at 50% modulation, calculate the total transmitted power 3 a) Explain the working of a diode detector for AM demodulation with diagrams. (10)b) A 12 GHz receiver consists of first stage with gain G1 = 30 dB and noise temperature (5) T1 = 20 K, a second stage with gain G2 = 10 dB and noise temperature T2 = 360 Kand third stage with gain G3 = 15 dB and noise temperature T3 = 1000 K. Calculate the effective noise temperature and noise factor of the system. Take the reference temperature as 290 K. PART B Answer any 2 questions. Question No.4 is compulsory. a) With block diagram, explain the working of a super heterodyne receiver and list 4 (10)their advantages.

- b) Write the advantages of double conversion receiver. (5)
- 5 a) With neat block diagram, explain the generation of SSB using phasing method. (10)
 - b) Explain the factors that affect the sensitivity and selectivity of a super heterodyne receiver. (5)

OR

- 6 a) With block diagram, explain the working of a balanced modulator circuit using FETs, for the generation of double sideband suppressed carrier. (10)
 - b) Compare the merits and demerits of AM and FM. (5)

PART (

Answer any 2 questions. Question No.7 is compulsory.

- 7 a) With a block diagram, explain the FM demodulator using PLL. (10)
 - b) Explain with diagrams, how the response of parallel tuned circuit is made use for the demodulation of FM. (10)

E B4E0572

8 a) With block diagram, explain the working of a Foster Seeley discriminator. (10)

b) With supporting equations and block diagram, explain how the FM can be obtained (10) using PM.

OR

9 a) Explain FM modulator circuit using JFET reactance modulator, taking particular case of Z_1 as capacitive reactance and Z_2 as pure resistance. (10)

b) Explain with circuit diagrams and response, the pre-emphasis and de-emphasis in FM. Also write the need for pre-emphasis and de-emphasis in FM.
